We are about to roll out a large burn down plan for the MedCare gloves in specific. I am interested to know what they didn't like... lots of folks have received these gloves.

Also, yes, there are many different glove brands for you all at B51. See below.

Are there any other brands of Mediums available that we can send to West? I know Rutherford received these as well and I haven't heard of any complaints.

If they aren't a fan why do you want to know if they are in stock? Lol, so confused.
The medium size is at B51. There are some at C89 Jeffersonville as well.

Hi Vince!

Are you able to see if B51 has any of the "MedCare" Nitra Force branded gloves in stock? We have rarely received complaints about the 3PL Gloves - but West is not a fan of this particular glove.

Thanks Vince. If we don't scale back allocations, I'm afraid this burn-down will drag out for far too long. While the gloves in 3PL aren't your contracted gloves and don't carry all of the test data that our gloves do, they do appear to be good quality gloves. This will just become a bigger and bigger issue the further we get past the pandemic. If we don't burn through these now, it will become increasingly difficult later in the year going forward. As we discussed on Friday, I'd be ok reducing allocation to 25%, but we'll never burn down the 3PL gloves if we keep allocations at 100%.

Terrific news below Vince! Sorry I didn't get back to you until now.

Yes, this is terrific news. Once gloves are transferred from C89 to all branches we can start the burn down process.

However, due to the fact that the MEDCARE NitraForce nitrile glove may not be chemo approved (still waiting on the chemo testing reports from MHUB/RockFintek), I'm hesitant in freezing allocation of the TRG series gloves. If I move the MEDCARE NitraForce gloves and other 3PL purchased gloves to our shared item master then announce on national call for a couple weeks that folk's need to purchase these gloves going forward for 4 month's, then monitor purchase volumes/usage, I'm positive that we will see an uptick in gloves purchased from 3PL. I personally do not want to freeze allocation at all, I think it is too risky and I do not want their to be excessive backlash from the field. We can discuss further during tomorrow's 8:30 call.

Brad & Sarah,

Do we have the ability to provide visibility to 3PL items in Medline.com?

Thanks,

Adam

Hi Adam -

We moved the AENMDCORE gloves to our shared item master. Jeremy Work setup the items in his store room IBU 34015 and auto replenishment successfully ordered the items, PO number below. I am hoping to see the order fill on your side soon.

Purchase Order: 340150000158236

Jeremy is inquiring about seeing these items on medline.com. Are you able to add the items to his profile so he can see availability?

Thank you,
Vince

Vince,

These are setup in our STOR IBU now 34015, and they did run on replenishment just now. Can you get Medline to give me access to the 4 part numbers so I can verify what they have on hand at b48?

Hi There -

As discussed, Jeremy has volunteered to pilot our ordering of 3PL gloves for Novi.

Nate the gloves you can have moved over to the shared item master are below. Once this move is completed by Ascension Technologies we will want to notify Jeremy so that he can assign the items to his storeroom IBU and pars to ensure POs transmit out to Medline accordingly following the same replenishment process as any other item ordered from Medline.

Team -

For the Nitrile Glove category we were able to attain a healthy stockpile of nitrile gloves at our Medline 3PL locations that have helped keep clinicians and operations safe during the course of the pandemic. I'd like to deplete this stock to a more suitable and cost effective 90 day long-term pandemic stock amount.

I am rolling out a 3PL Nitrile Glove Burn Down effort similar to what was done in the past for isolation gowns with one caveat....this time the 3PL SKUs will be moved from our pandemic item master to the shared item master so ops folks can set the 3PL SKUs up in their Supply Chain/Central Supply departments and PAR locations and order as necessary. This process was already piloted in Michigan and has been successful.

1. All ministries have purchased nitrile gloves from the 3PL throughout 2020 and 2021 so folks have already been stocking their locations with these nitrile glove subs/alternatives
2. I presented this topic on a National Implementation call and Area Director call so these two groups are aware of this burn down effort
3. I will be presenting on an upcoming National Operations call.
4. All Medline Distribution Centers (DCs) that service your ministries are stocked with these 3PL nitrile glove SKUs
5. I will provide a crosswalk that shows the 3PL nitrile glove SKUs folks will need to set up in their Supply Chain/Central Supply departments and PAR locations. Most will be asked to set up BIN locations for the MEDCARE NITRAFORCE branded glove (chemo drug testing results attached).

I believe this burn down can be achieved without having to remove, change, or freeze any current nitrile glove allocations. The objective will be for your teams to prioritize the purchasing of these 3PL nitrile glove SKUs for July, August, Sept, Oct then go back to buying nitrile gloves from the primary Medline channel.

More emails to come on this topic, but if any of you have any questions/concerns, please let me know.

Thank you,
Vince
